

# **VOTING SYSTEM**

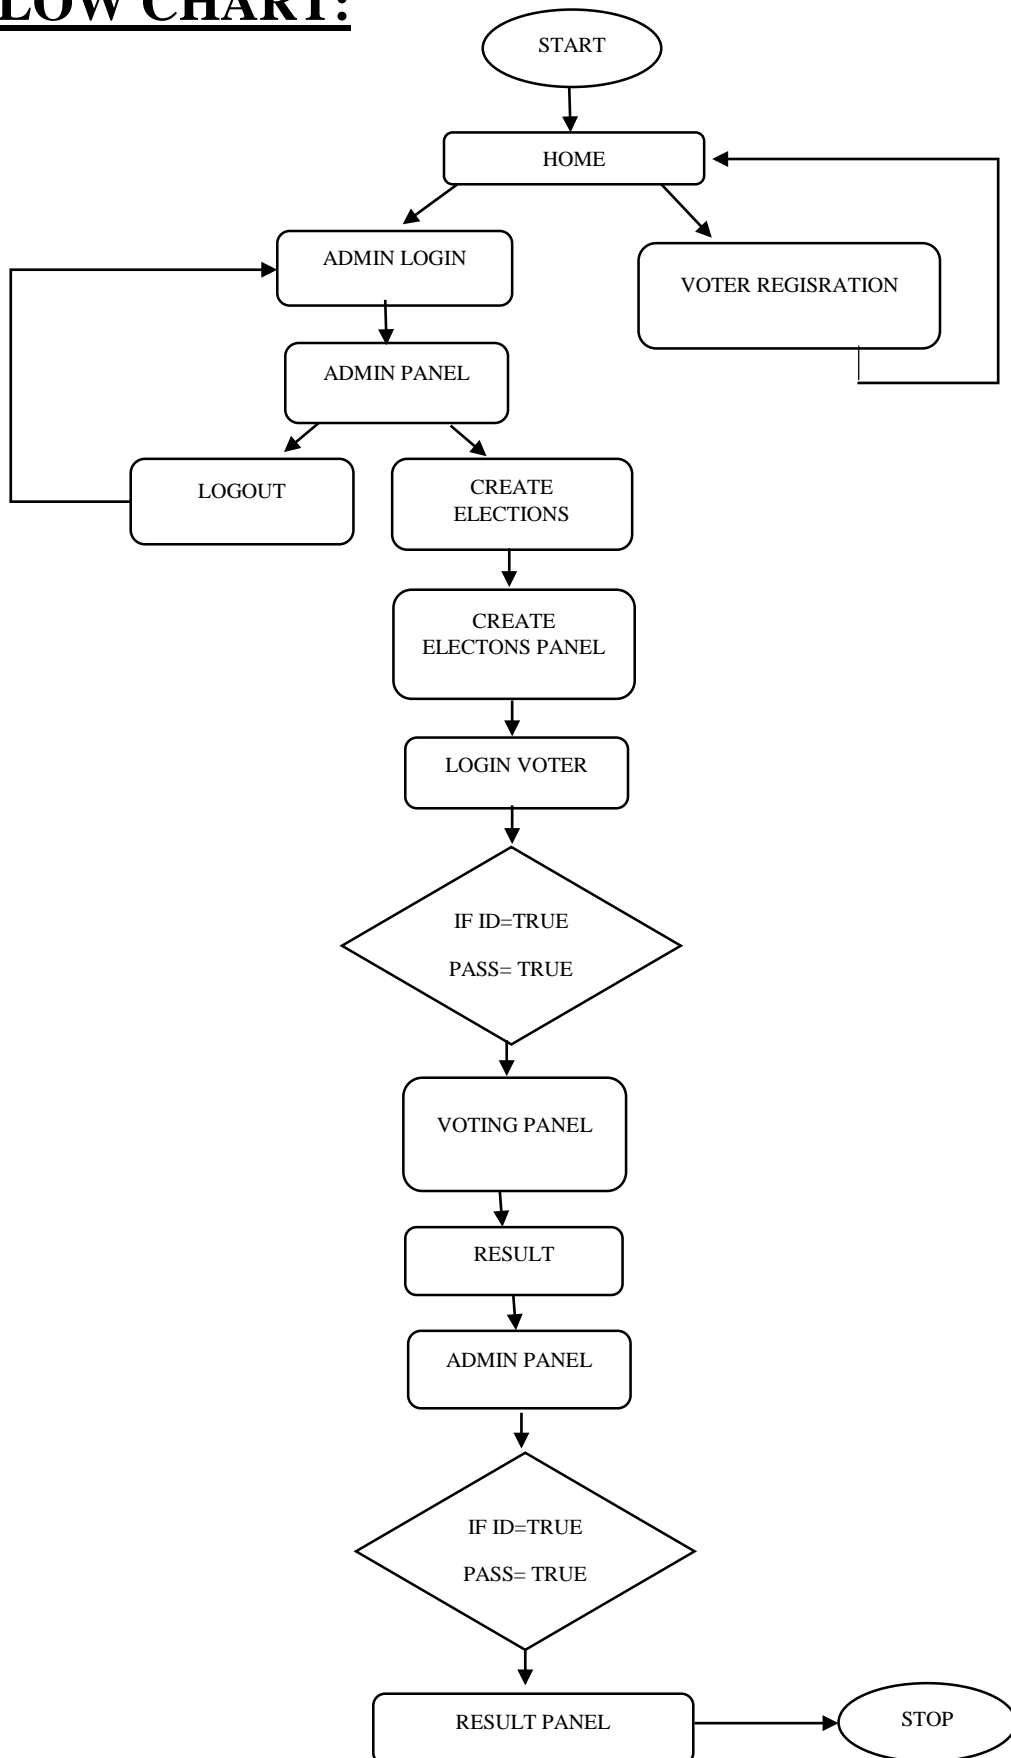

## **OBJECTIVE:**

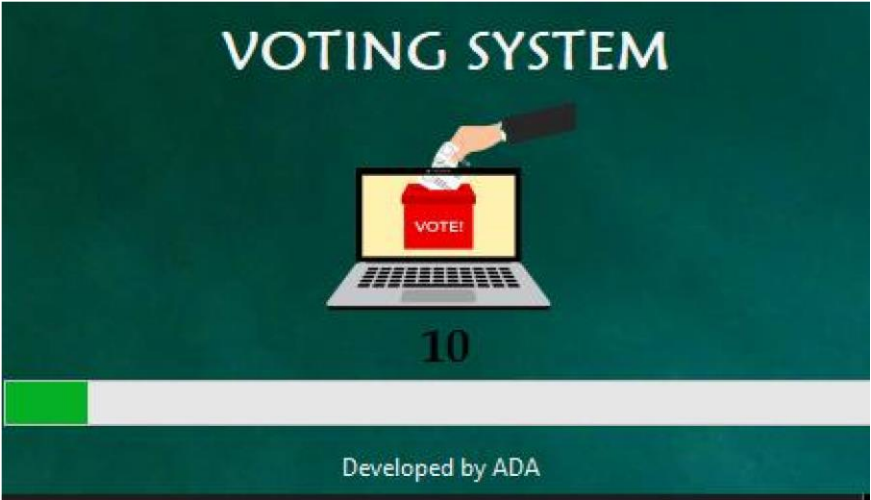

To make an application to cast vote during elections in which voters can chose their wanted candidate and results would be announced with the most transparency, in C-Sharp using Windows Application Form and applying concepts of OOP.

## **PROJECT DESCRIPTION:**

In this Application we have given an admin panel in which only admin can access then comes the voter registration. Admin has the access to create election. Whereas, User can login with their registered Ids' and cast votes. Also, there is a range of Ids' who can cast votes. Now finally Admin can announce the result by logging-in with the most of security and transparency.

This image shows a presentation slide for an 'E-VOTING SYSTEM' admin login interface. The background is a solid teal color. At the top, there is an illustration of a hand placing a yellow ballot into a stack of white papers. Below this illustration, the text 'E - VOTING SYSTEM' is written in white capital letters. Underneath that, the word 'ADMIN' is written in a larger, bold, white capital font. To the left of the login fields is a large, stylized white icon of a right-pointing arrow inside a bracket. The login fields consist of two white input boxes: the first is labeled 'USERNAME' and the second is labeled 'PASSWORD' in white capital letters. To the right of the password field is a small white checkbox followed by the text 'Show Password'. Below the input fields, there is a link that says 'Register as voter' in a small, white font. At the bottom, there are three white buttons with black text: 'REGISTER VOTER', 'CLEAR', and 'LOGIN'. In the top right corner, there is a small white square button with a black 'X' icon.
